Subject: Microsoft Settlement

Dear Sirs,

I believe that the proposed settlement agreement is a bad idea, m'kay? No, really. There are no provisions for Microsoft documenting the API's they DO release, and there is very restricted third-party developer access to any API's, among many other items. Microsoft must be taken to task for its constant anti-competitive practices and this settlement WILL NOT accomplish anything.

Thank you.

Respectfully,

Todd Azzara, Senior Real-Time Adaptor Developer
